

KEEPING CRITICAL SYSTEMS PERFORMING FOR LIFE.

Willo provides the **specialized expertise** to keep detention door, locking, and control systems operating safely and reliably throughout their entire lifecycle.

Keeping critical security infrastructure performing as intended requires ongoing attention, maintenance, and support. From assessments and installation support to preventative maintenance, repairs, training, and replacement parts, we partner with correctional facilities to maximize system performance, extend equipment life, and help prevent unexpected failures.

REPAIR SERVICES

Repair and restoration of detention locks, sliding door systems, control panels, gates, and related security equipment.

PREVENTATIVE MAINTENANCE

Proactive maintenance programs that maximize equipment performance and service life.

CONSULTING / ASSESSMENTS

On-site evaluations to identify operational issues, equipment conditions, and potential security risks.

ON-SITE TRAINING

Hands-on instruction that equips maintenance personnel to confidently operate and maintain detention systems.

MAINTAIN THE CRITICAL INFRASTRUCTURE THAT KEEPS DETENTION FACILITIES SAFE AND SECURE.

REPAIR SERVICES

Repair and restoration of detention locks, sliding door systems, control panels, gates, and related security equipment.

- Scheduled and emergency repairs
- Troubleshooting and diagnostics
- Component replacement
- Door adjustments
- System restoration

Technicians quickly asses damage or issues and work to restore functionality while helping facilities stabilize operations and reduce disruption.

PREVENTATIVE MAINTENANCE

Proactive maintenance programs that maximize equipment performance and service life.

- Inspect locks, control systems, and hardware
- Clean, lubricate, and adjust components
- Inspect switches, wiring, and connections
- Identify developing issues before failures occur

Preventative maintenance helps improve reliability, reduce unexpected failures, and extend equipment life while providing documented service reports. Specialized technicians inspect, adjust, and document system performance to help keep locking systems operating as intended.

CONSULTING / ASSESSMENTS

On-site evaluations to identify operational issues, equipment conditions, and potential security risks.

- Diagnose recurring failures
- Evaluate overall system condition
- Detect tampering concerns
- Prioritize repairs and future upgrades

Detailed reports and recommendations support maintenance planning, budgeting, and long-term reliability.

ON-SITE TRAINING

Hands-on instruction that equips maintenance personnel to confidently operate and maintain detention systems.

- Troubleshooting techniques
- Door and lock operation
- Routine maintenance
- Early issue identification
- Equipment-specific guidance

Helps preserve institutional knowledge, minimize the impact of staff turnover, and strengthen day-to-day maintenance.

ADDITIONAL SUPPORT

- Replacement parts and retrofit components
- Hard-to-find and discontinued lock parts
- Key cutting and replacement
- Support for aging detention infrastructure
- Custom retrofit solutions
