THE VH1 BY WILLO PRODUCTS

Sliding Vehicle Gate

The Willo VH1 Gate Operator is a maximum security device for a sliding chain-link vehicle gate. The system features an individual motor for propelling each gate through a clutch and chain drive. The device locks the gate in the closed position with 3 locking lugs on the front edge of the gate. The gate can be operated either electrically from a remote location or manually at the gate by unlocking the access door location, positioning the clutch lever, and rotating the crank handle to propel the gate open or close.

Benefits and Features

- Chain Driven
- 3 Lug Front Locking
- 1/3 HP 115 VAC, instantly reversible motor, equipped with an adjustable electro-mechanical clutch
- Travels at approximately 7.5 inches/second
- Local manual operation from within the release column lockable access door
- Hinged access panels for easy maintenance
