

HP3

Hand-Pull Locking Device (Kick Release)

Features...

- 4-Point locking
- Limit switch monitors position of drop bar. Secure indication given only when drop bar is fully engaged in locked position.
- May be opened using a paracentric key at each door
- Electric unlocking with heavy duty, durable, drop bar motor
- Automatic locking when door is moved to fully opened or closed position
- Passes ASTM F1643 cycle test of 500,000 cycles

Retrofit:

- Uses existing control wiring
- Uses existing door, lock post, receiver, and housing above door

Options...

- Paracentric lock located in bottom of housing. Allows opening by key at each door without added expense of a Release Column.
- 120VAC or 24VDC motor
- Highly visible, 30mm, **Red/Green** Door Indication LED at each door
- Remote individual manual release
- Remote gang release
- Can be converted to a Fully Driven Device by adding a drive motor. (requires controls modification)
